

A Learn-&-Build Workparty

Warm Home Window Inserts

**With the Home
EmPOWERment Project**

Learn a simple method to build
insulating window inserts that can help
you save on energy bills
Perfect for single-pane or aluminum windows

We provide the tools and materials, you bring
measurements and friends - and together we'll
build a set of inserts for your house (and for
others) to stay warm and save money this winter

Thanks to the City of Olympia
Housing Program this Workparty
Series is FREE to eligible low-
income households (others pay cost of
materials and a small workshop fee).

**These Workparties are Hosted by
the Olympia Unitarian Church:**

2300 West End Ct, Olympia

Dates in This Workparty Series

- Thursday January 13, 5 -10 pm
- Thursday January 27, 5 -10 pm
- Thursday February 10, 5 -10 pm
- Saturday February 19, 12-5 pm

**Once you contact us, we will
send you a Registration Form
and Window Measurement Form**

Are your windows putting a *CHILL* on your comfort and your budget? Save energy, cut costs and help the environment while you learn in a fun community setting how to build simple, low-cost interior insulating window inserts. These double layered windows fit snugly inside the window opening, are easily removable and can be made in custom sizes. They are built with local wood, shrink wrap and weatherstripping. This strategy was developed in Maine and can be viewed on a Maine news channel at:

<http://www.wesh6.com/news/local/story.aspx?storyid=99333>
