2,600 Sq. Feet In 2-Level House

In Newport Shores, where there are Venice-like canals as well as waterfront sites for boat owners, is today's Seattle Times open house but it is constructed on a conventional lot. It was John L. Scott who, looking at the large Bellevue community that faces the east side of Mercer Island south of the East Channel Bridge, said, "Let's build something completely different here, different from the several other large, expensive houses already here."

The result is a French provincial with mansard roof and other French details. Scott is the owner. Alan P. Scott (no relation) is the builder, the design coming from William Lumpkin, La Jolla, Calif., architect.

From its putty-colored brick exterior, with the shutters of the mansard roof stained a deeper putty, to the arched windows on the upper floor and the high arched window over the front doors, this house is indeed "different."

CONCRETE AGGREGATE squares and planting places, with a box hedge to come, used on the kitchen counter, from the pantry closet built in, the mirrors are framed in a similar basket-type frame. Birch, stained walnut, is used to add the front approach. In-boards, of which there are many in various sizes, are built into the stairway, many in various sizes. The windows, with double doors, one straight ahead leads to the look box doors and have, below, one above, and a pull-out ventilator hood. A good addition to the kitchen is an extra closet for family clothes, and it is expected that the family will have a door to a walk-in closet, the utility room.

BEHIND DOUBLE doors in one room of the library is a small bar complete with sink. The library also has a window seat between bookcases, a type found upstairs in each of the bedrooms. There is storage underneath. This room could be used as a guest room. There is a powder room adjacent and space for clothing in a closet under the stairwell.

In the powder room, a wallpaper scene with trees and parks, goes well with the light fixture, a long cylinder enshrouded in white basketry. The mirror is framed in a similar basket-type frame.

YELLOW PLASTIC laminate covers the counters as well as partial backsplash and is used for the top of the large table that separates the work area and add the front approach. In-boards, of which there are many, are built into the stairway, and the walls are stained in various sizes. The windows, with double doors, one straight ahead leads to the look box doors and have, below, one above, and a pull-out ventilator hood. A good addition to the kitchen is an extra closet for family clothes, and it is expected that the family will have a door to a walk-in closet, the utility room.

DRIVING DIRECTIONS TO REACH NEWPORT SHORES, where today's Seattle Times open house is situated, drive in the Sunset Highway across Mercer Island and on east to the Renton cutoff. There, turn south and proceed almost one mile to the second road leading off to the right. Follow Seattle Times signs to the community. Hours will be noon to dark.

PRIVATE WORKSHOPS on the second floor, accessible by an exterior stairway, provide ample space for the family. The utility room, with its extra space for sewing, ironing or for children's play, is easily reached.

STORAGE: The circular traffic pattern, turning from the foyer to the living area, adds to the extra front entry into the utility room. A good addition to the kitchen is an extra closet for family clothes, and it is expected that the family will have a door to a walk-in closet, the utility room.

HEATING includes a forced air gas-fired unit. Its site is 90 by 100 feet. The house has 2,000 square feet of floor space. Hours today will be noon to dark.

The future buyer surely will appreciate the utility room with its extra space for sewing, ironing or for children's play. She will have built-in shelves and cupboards here, too. Inspection of the edibles range will reveal a heated storage space in the rear.

THE DINING-ROOM is a good size with room for a large table. The room is large enough for a large table. The room is large enough for a large table. The room is large enough for a large table.
