.. Home planning can be a thrilling adventure in selecting features of enduring worth which will yield rich dividends in a sound, durable, beautiful home for those you love.

Building the family home is a most important family project—because the home establishes the background of family life and its place in the community.

Because it represents a large investment, you are entitled to a home that satisfies definite requirements of lasting satisfaction and convenience. It must be a Truly Modern Home.

To help you secure such a home for your family, the Weyerhaeuser 4-Square Home Building Service was created. Prominent architects and engineers were consulted. Specialists in heating, ventilating, lighting, and plumbing conferred with home economists and manufacturers of equipment needed in the modern home. All contributed the benefits of their experience and knowledge toward making the homes in this Service ideally suited to modern, economical living.

This little booklet gives only a glimpse of the benefits to be gained by studying the details of all the designs in the large, colorful Master Book at the office of your 4-Square Lumber Dealer.
PLAN 41-A
FOUR ROOMS—ONE STORY
12,515 CUBIC FEET

PLAN 41-B
FOUR ROOMS—ONE STORY
13,533 CUBIC FEET

A good front is an important factor of any homes, but this home in addition to fine appearance, has more than a neat front view. Good planning, wise construction, and correct use of materials.

In this small house you witness an example of how utility and comfort must be the part of an able designer. Because a home is not only a place of shelter, but it's also a place to be enjoyed, the layout of the rooms is very important. This house is designed to provide comfort, convenience, and economy.
PLAN 41-C
FOUR ROOMS—ONE STORY
14,343 CUBIC FEET

New England Colonial from the tip of its chimney to the authentic shed roof line at the rear of the wing, this compact small home provides the charm and comfort associated with the best of good living.

Royal Barry Wills, Architect

PLAN 41-D
FOUR ROOMS—ONE STORY
16,226 CUBIC FEET

Mr. Chapin has created a house of dignity and warmth, adapted to the demands of modern comfortable living. Its simplicity is the result of skilled planning.

Rollin C. Chapin, Architect
Plan 41-G
Four rooms—One story
14,716 cubic feet

This compact small home is planned for maximum comfort. During the winter, the bedrooms at the rear of the house are close to the central heating system. In the summer, they are shaded from the sun. The living room has large windows that face north, east and south, and plenty of storage space is provided in the garage, which is heated as well as cooled. The first floor has a study, a large kitchen and a bathroom. The second floor has two bedrooms, a bathroom and a linen closet. The attic is also accessible from the second floor. The house is designed for easy maintenance and is easy to build. The author is Raynor Chapman, architect.

Plan 41-E
Four rooms—One story
15,276 cubic feet

The covered entrance, guest clothes closet, dining alcove, and practical features of this popular small home. The living room has large windows that face north, east and south, and plenty of storage space is provided in the garage, which is heated as well as cooled. The first floor has a study, a large kitchen and a bathroom. The second floor has two bedrooms, a bathroom and a linen closet. The attic is also accessible from the second floor. The house is designed for easy maintenance and is easy to build. The author is Raynor Chapman, architect.
PLAN 41-H
FOUR ROOMS—ONE STORY
16,281 CUBIC FEET

The recessed doorway and generous guest closet off the entry add a hospitable touch to this small home. Good window placement and ample wall areas make the decorating of the living room a delightful task.

Lee, Pearson & Richards, Architects

PLAN 41-K
FOUR ROOMS—ONE STORY
19,722 CUBIC FEET

This small home features two porches for those who enjoy outdoor living. The rear porch, which overlooks the garden, can be reached from both the kitchen and living room.

Randolph Evans, Architect
PLAN 41-L
FOUR ROOMS—ONE STORY
19,125 CUBIC FEET

Distinctive details give this small home personality. Just a few steps separate the attached garage from the service door. An attractive fireplace set in a panelled wall adds charm to the living room.

Currie Chambers, Architect

PLAN 41-M
FOUR ROOMS—ONE STORY
16,700 CUBIC FEET

This popular small home has all the advantages of traditional design combined with modern planning, construction, and materials. The wide living room bay window and the dining alcove with its handy china cupboard add distinction to this plan.
PLAN 41-O
FOUR ROOMS—ONE STORY
14,630 CUBIC FEET

PLAN 41-N
FOUR ROOMS—ONE STORY
18,031 CUBIC FEET

Excellent lines and proportions make this "growing home" unusually attractive. The second floor can be finished off with the addition of a later date. The porch provides for gracious outdoor living.
PLAN 41-P
FOUR ROOMS—ONE STORY
19,546 CUBIC FEET

French doors lead from the 23-foot living room to the 14-foot terrace—a secluded and pleasant spot for summer recreation. Note the ease with which all rooms can be reached from the central hallway.

Amedeo Lapone, Architect

PLAN 41-Q
FOUR ROOMS—ONE STORY
18,687 CUBIC FEET

A feeling of spaciousness greets guests who step through the recessed doorway of this home. Study reveals many features for gracious living. Wide French doors lead from the living room to the terrace.

F. M. Overby, Architect
PLAN 4119
FOUR ROOMS—ONE STORY
15,870 CUBIC FEET

PLAN 41-R
FOUR ROOMS—ONE STORY
22,383 CUBIC FEET

This home retains traditional Colonial beauty, yet is thoroughly modern in design. It has the comforts of a small family, yet is generous and nicely arranged.

The corner fireplace, with built-in bookcases, gives a cozy service entrance, as well as an entrance to the attached garage.
PLAN 4120
FOUR ROOMS—ONE STORY
20,200 CUBIC FEET

This house, with garage attached, is one of the most popular designs in the Service. In addition to possessing architectural character, it's a home that will always be easy to live in—comfortably.

Bertram A. Weber, Architect

PLAN 4121
FOUR ROOMS—ONE STORY
16,850 CUBIC FEET

Here you see a really practical home. It can grow with the family's needs. A feature of good planning is the provision for additional bedrooms on the second floor when needed.
PLAN 4122
FOUR ROOMS—ONE STORY
20,920 CUBIC FEET

Designed for living with the sun, this solar home—small in size—illustrates how the best in comfortable, economical living can be combined with good colonial styling.

PLAN 4123
FOUR ROOMS—ONE STORY
20,739 CUBIC FEET

This ideal, modern solar home welcomes the sun when you need it in winter, and excludes its heating rays during the height of warm summer days. You will like this house.
PLAN 42-C
FOUR ROOMS—TWO STORY
11,938 CUBIC FEET

PLAN 4124
FOUR ROOMS—ONE STORY
32,320 CUBIC FEET

Designed for intelligent economy, this compact 24-foot wide house has been planned to appear, low and snug by exterior. The living room, with three windows overlooks the depth of the property. The kitchen, family room, and two bedrooms occupy the rear. The two additional bedrooms and bath are on the second floor.
PLAN 51-D
FIVE ROOMS—ONE STORY
14,175 CUBIC FEET

PLAN 51-C
FIVE ROOMS—ONE STORY
17,096 CUBIC FEET

Note how the living room and dining room, separated only by a wide archway, provide a living area 25'-0" x 12'-0". Privacy and good circulation are maintained in the bedrooms.

H. T. Lemburg, Architect
PLAN 51-E
FIVE ROOMS—ONE STORY
18,527 CUBIC FEET

This shingled cottage has many of the outstanding features that spell "home" in the true American sense. The well trimmed gardens are an asset to all rooms as well as affording privacy in the bedrooms.

Royce Bower & Richards, Architects

LIVING ROOM
16' 4" x 17'-6"

BEDROOM
11'-6" x 11'-5"
PLAN 51-G
FIVE ROOMS—ONE STORY
18,150 CUBIC FEET

With a mere suggestion of a partition separating the living room and dining room, an air of spaciousness pervades the charming home. Excellent wall space allows pleasing furniture arrangements.

Leo. Pearson & Richards, Architects

PLAN 51-H
FIVE ROOMS—ONE STORY
16,630 CUBIC FEET

An open layout with easy circulation between rooms is one of the desirable features of this home. The rear patio, (see details) open to the sun but protected from sharp breezes, makes outdoor living enjoyable much of the year.

Curtis Chambers, Architect
PLAN 51-K
FIVE ROOMS—ONE STORY
17,548 CUBIC FEET

A compact five-room plan, this home has a pleasing veranda of lines. The sheltered porch opening off the living room is one of a number of projected details.

PLAN 51-J
FIVE ROOMS—ONE STORY
16,061 CUBIC FEET

The friendly bay window and the decorative columns in front of the living room wing reflect the character of this charming home. A sheltered entrance is another welcome feature. Cross ventilation is provided in each of the rooms.

Arthur N. Shinn, Architect
PLAN 51-M
FIVE ROOMS—ONE STORY
22,901 CUBIC FEET

This popular story-and-a-half house, with attached garage, is ideal for the small family. As the family enlarge, the second floor can be finished with bedrooms and a second bath.

PLAN 51-L
FIVE ROOMS—ONE STORY
27,290 CUBIC FEET

This excellent plan provides three bedrooms, living room, dining alcove, and kitchen—all arranged compactly on one floor. In addition, there are six generous closets for ample storage space.

Lea, Pearson & Richards, Architects

John M. Mow, Architect
PLAN 51-O
FIVE ROOMS—ONE STORY
21,788 CUBIC FEET

This is another popular version of New England Colonial—
with its sheltered front yard and white picket fence. A stair-
way and dormer are provided so that future finishing of
the second floor is practical and economical.

John M. Linn, Architect

PLAN 51-N
FIVE ROOMS—ONE STORY
21,005 CUBIC FEET

In this charming Colonial design, many features reflect the
traditional beauty of New England's architecture. Excellent
downstairs space is provided, including a utility closet off the hall.

Charles Stovall, Architect
PLAN 51-P
FIVE ROOMS—ONE STORY
21,274 CUBIC FEET

The architect has planned for maximum economies in the plumbing arrangement in this practical design by placing the kitchen and bathroom back to back. The service door from the garage conveniently opens on the front porch.

James Seavil, Architect

PLAN 5117
FIVE ROOMS—ONE STORY
20,330 CUBIC FEET INCLUDING GARAGE

Good looking on the outside—good living on the inside! This modern home has the double endowment of exterior charm with a most generous share of interior conveniences.
PLAN 5118
FIVE ROOMS—ONE STORY
24,230 CUBIC FEET

Strong horizontal lines create an appearance of bigness in the house, further enhanced by the impression of size and stability.

PLAN 5119
FIVE ROOMS—ONE STORY
21,560 CUBIC FEET

This Modified Colonial design is as modern as tomorrow. It's a pleasing home, with a comfortable community. The exterior of the house is defined by its elegance and character as well as provide for enduring private living. Arch.
Here you see a truly modern home that will never become "dated." You will find in this design the satisfying comfort of a project made possible, plus the beautiful simplicity of the best in good architecture.

The ranch house, city style, has quickly become extremely popular with attractive large rooms in a useful layout.

PLAN 5120
FIVE ROOMS—ONE STORY
25,500 CUBIC FEET

PLAN 5121
FIVE ROOMS—ONE STORY
23,057 CUBIC FEET
PLAN 52-A
FIVE ROOMS—TWO STORY
13,774 CUBIC FEET

The living room of this striking two-story bungalow features a large bay window and long expanses of unbroken wall space that permit a wide choice of decoration and furniture arrangement.

PLAN 52-C
FIVE ROOMS—TWO STORY
10,569 CUBIC FEET

This well proportioned house makes excellent use of every available foot of floor space. Five closets, with two large ones in the master bedroom, supply more than the usual amount of storage space.
PLAN 52-H
FIVE ROOMS—TWO STORY
17,087 CUBIC FEET

With the dining room adjoining the living room, there is a
material saving in both floor area and cost. Three
exposures in both bedroom and dining room provide
comfy sleeping quarters.

Edward W. Tanner, Architect

PLAN 52-F
FIVE ROOMS—TWO STORY
10,704 CUBIC FEET

Three exposures, with 16 feet of windows plus a French
door, make the living-dining room of this house extremely
interesting. An intriguing bookcase treatment helps to form
a separate entry.

W. T. Lindsay, Architect
PLAN 52-J
FIVE ROOMS—TWO STORY
14,961 CUBIC FEET

For those who prefer formal dining, the attractive full-sized dining room is completely separated from the living room. The cheery corridor type kitchen has the endorsement of culinary experts.

Robert C. Martin, Architect

PLAN 62-A
SIX ROOMS—TWO STORY
15,689 CUBIC FEET

Good window grouping and unbroken wall areas give the living room of this home unusual potentials for a variety of decorative treatments and furniture arrangements. The dining room is charming with its three-window bay.
PLAN 62-D
SIX ROOMS—TWO STORY
16,109 CUBIC FEET

PLAN 62-B
SIX ROOMS—TWO STORY
16,330 CUBIC FEET

A classic yet inviting simple and masterfully planned for gracious living. The living room has been designed to include the delightful features you will discover.

Dwight James Bouw, Architect

M. T. Lindberg, Architect
PLAN 62-F
SIX ROOMS—TWO STORY
19.468 CUBIC FEET

PLAN 62-F
SIX ROOMS—TWO STORY
20.271 CUBIC FEET

The den at one of the focal points of interest is a feature of this home designed in the New England tradition. As you examine the plan, note the large sitting room and utility storage.

H. William Johnson, Architect

These spacious bedrooms are provided with 50 square feet of floor space and are furnished with three large closets each. Cross ventilation, as well as generous closet space, are features of each bedroom.

E. H. Lundin, Architect
Lumber is our best and most economical building material. Nevertheless, the research and technical divisions of Weyerhaeuser are constantly seeking new ways of stepping up lumber performance. Their contributions are doing much to aid in making America's buildings serviceable, modern and structurally sound.

The Home Building Service is one example.

PLAN 31-B
THREE ROOMS—ONE STORY
11,200 CUBIC FEET

This three-room home, combining a service verandah and a second bedroom, can be easily converted into a one-bedroom, one-bathroom apartment, if desired. The kitchen provides ample space for dining.
