HOME OF THE MONTH

Suburban Residence Has Own Waterfall

OPEN HOUSE: The Home of the Month, designed by the architectural firm of Wilkins & Elkins for Mr. and Mrs. Pan K. Eng, will be open today from 1 p.m. to 4 p.m. at 5039 W. Mercier Way, Merton Island. This site is

By MARGARET H. PHILLIPS

Pan K. Eng, resident at 5039 W. Mercier Way, Merton Island, was chosen by the Seattle Chapter of the Architectural Institute of Architec
tests and The Seattle Times as Home of the Month. The architectural firm of Wilkins & Elkins designed the suburban home. Edward Wa
tasko, landscape architect, planned the gardens around the house. The home will be open from 1 p.m. to 4 p.m. today.

The owners, the architects and the landscape architect collaborated to create a home that is open to the view. The site and house are located in the northern part of the property. A driveway on one side of the property is a neighbor
daily living area on the干涉可

IT WAS decided to use the sloping of the lot to advantage by creating a large pyramid. A pyramid roof features an interesting and unique design over the living area is an integral part of the house.

The living area is divided into three levels. The upper level contains the family room, kitchen, dining room, and study. The middle level contains the master bedroom, bathroom, and laundry room. The lower level contains the garage and storage area.

LIVING LEVEL: The upper level is a spacious, open concept area with a large entertainment area. The living room features a fireplace and large windows that allow natural light to enter the space. The dining room is adjacent to the kitchen, which includes a large island and plenty of counter space.

ONE OF THE unique features of the house is the indoor waterfall. The waterfall is located in the living room and is an impressive centerpiece. It is constructed of stone and water flows from the top level to the lower level. The waterfall is surrounded by water features, creating a serene and relaxing atmosphere.

PLANNING: The design and construction of the house were completed by Wilkins & Elkins. The house is located on a corner lot, allowing for maximum natural light and views. The materials used in the construction were carefully selected to offer durability and low maintenance.

This home is an example of how modern architecture can be integrated into suburban living. The layout of the house is both functional and aesthetically pleasing, offering a comfortable and enjoyable living environment.
